About Media Box

Media Box is designed to enable the distribution of digital information to areas with little or no Internet access, even off the grid. It does so using open source software and very inexpensive hardware, allowing the distribution of digital information at a far lower cost than other solutions. If you'd like to learn more about the Media Box Project, please visit http://Media Box.us when you get back to the Internet.

Thanks

Statistics

Media Box is designed to be safe and secure. No logins are required and no user data is logged. The system is purposely not connected to the Internet in order to prevent tracking and preserve user privacy.
